introduction

Congratulations on your purchase of the Clifford SmartWindows 4, a G4/G5 system accessory. Your Clifford G4/G5 system is SmartWindows 4 ready and will automatically close your car's power windows every time you arm your Clifford G4/G5 vehicle security system with the system's remote control.

In order to maximize the use of this system, please review this owner's guide carefully prior to using your system. You can print additional or replacement copies of this owner's guide by accessing the Clifford website at www.clifford.com.

your warranty

Your warranty registration must be completely filled out and returned within 10 days of purchase. Your product warranty will not be validated if your warranty registration is not returned. Make sure you receive the warranty registration from your dealer. It is also necessary to keep your proof of purchase, which reflects that the product was installed by an authorized dealer.

autoclose upon remote arming

When you arm your G4/G5 system with the system's remote control, SmartWindows 4 will automatically close the two power windows it controls. If you have two SmartWindows 4 modules installed (to control four power windows), the second set of windows will AutoClose after the first pair have completely shut. For safety reasons, the windows will not AutoClose when your Clifford system AutoArms.

one-time by pass of autoclose

To arm your system without closing the windows, turn the ignition on and off rapidly. You'll hear a siren chirp to confirm the windows will not AutoClose when you remotely arm. (This also invokes the AutoArming Bypass feature noted in your G4/G5 system manual.) Normal operation is restored when you next disarm.

remote control venting

To vent the windows on hot days, press button combination  +  (or LevelShift once, then  on the 5-button remote, if so equipped) within 10 seconds of remotely arming the system. Your installing dealer can adjust the ventilation opening to the exact amount you desire.

multiple venting

Pressing this button combination again within the same 10 seconds will further vent the windows by the same increment.

remote control opening

Press the button combination noted above within 10 seconds of remotely disarming the system to fully open the windows.

remote quickstop

For safety purposes, you can instantly reverse window closure by disarming the system while the windows are still closing.

interior features

touchdown

Inside the vehicle, simply tap the down-side of the window switch to fully open the window without having to continuously hold the switch.

touchup

Similarly, a tap up of the switch will fully close the window.

interior quickstop

A tap of the window switch (in either direction) while it is moving will immediately halt movement. To roll a window halfway down, for example, you may tap the down-side of the window's switch (invoking TouchDown), then tap again and the window will halt.

safety features

SmartWindows 4, in addition to the QuickStop safety features, can detect obstructions and electromechanical failures. In such cases, it will automatically halt movement.
